To Whom It May Concern,

Over the last 18 months Craig Mautner has worked for me in the capacity of a Senior Member of Technical Staff, one of Wind River's most senior technical positions. During this period his performance goals and objectives have been met in all respects.

Craig has worked on several projects in my Service Line including a Personal Digital Assistant where Craig ported a third party Bluetooth stack to VxWorks and two microcoding projects for Network Processors. In addition he worked on the creation of a new programming paradigm for Digital Media in an embedded environment. All projects were done quickly and successfully and I was very pleased with the effort Craig put out and the quality of his work.

Craig has also participated in several Design Specifications and in the creation of engineering Proposals. Craig has demonstrated an ability to both write and present customer materials.

Craig has demonstrated a commitment to delivery, often doing whatever it takes to meet a customer commitment.

I sincerely recommend Craig for any technical position in the embedded field.

A handwritten signature in blue ink, appearing to read "Chris Perret".

Chris Perret
Service Line Director
Wind River Services
